Environmental Science

Anatomy and Physiology

Statistics

Notes

For the past 30 years, Dr. Earnshaw has worked in national laboratories, industry, state government, and environmental consulting firms. In 1998, Dr. Earnshaw founded Earnshaw Environmental, a consulting firm specializing in environmental regulatory compliance, radiation protection, and environmental assessment. In addition, the firm develops technical training seminars and courses in the areas of radiation safety and dose assessment, risk management, and environmental analysis. Earnshaw Environmental supports the Department of Homeland Security's REP Program.
